

Xavi's T-shirt

Emma

What do you notice?

Can you see any patterns?

What do you think the colours represent?

On the last colour there is always pink and yellow

there's missing with represents ~~21~~ because it's not a prime number

it only goes up to 6th

yellow is multiple 5

There is at least 1

prime number in most colours except the last colour and 1 in each row

green?

Blue 7

orange 11

pink 2

multiplying

so I describe 0 = prime numbers

⊕ = cube numbers

⊙ = square numbers

⊕ = x4

⊗ = x6

33 34 35 are all in half but are different colours
