

$$
\begin{aligned}
& b+e=c \\
& \text { so } a+b=c \text { if } a=e
\end{aligned}
$$

angle a is in a 1 by 3 right angled triangle; so is e;
ie the triangles are similar, so corresponding angles are equal, so $a=e$.
[or $\tan \mathrm{a}=1 / 3=\tan \mathrm{e}$ ]
