

You will need a 5 by 5 square and a dice.

Start in the top left hand corner and carefully roll the dice over as it journeys throughout the 5 by 5 square.

Whatever face of the dice is touching the grid square is written down on that square.
Here are some examples of the different journeys, but choose and/or invent your own:

You can also then explore the route with different dice positions (rotations) at the start.

What do you notice?
