- Infect susceptible neighbours
- Repeat until epidemic over
- Record total cases

- Remove to create first case
- Infect susceptible neighbours
- Repeat until epidemic over
- Record total cases
- Try with 48 vaccinated/16 not

## Reproduction number ( $\mathrm{R}_{0}$ )

$\mathrm{R}_{0}$ measures how quickly an epidemic will take off...

$$
R_{0}<1
$$

Cases decrease each step

$$
R_{0}>1
$$

Cases increase each step

## Herd immunity

## Herd immunity

Proportion of the population we need to vaccinate: $\frac{R_{0}-1}{R_{0}}$

- Rabies
- Flu
- Ebola (West Africa)
- Chickenpox
- Measles
