## Age 14+ Level $\star \star \star$ Worksheet 1

1. Triangular Slope

What is the gradient of OA?
What is the gradient of $A B$ ?

## 2. Graph Triangles

This is the graph of the line $y=-2 x+12$.
Point $P$ is on this line.

The ratio of the area of the red triangle to the area of the blue triangle is $1: 4$.

Find the coordinates of point $P$.

## 3. Inside a Parabola

The points where the parabola $y=k^{2}-x^{2}$ crosses the coordinate axes are joined to form a triangle.

The area of the triangle is 64 square units.
What is the value of $k$ ?

## 4. Closer to Home

Consider the graphs with equations $y=2 x-10$ and $y=x-6$. Which comes closer to the origin?
Can you find the shortest distance between this line and the origin?

## 5. Quadratic Rotation

The curve $y=x^{2}-6 x+11$ is rotated through $180^{\circ}$ about the origin.

What is the equation of the new curve?

These problems are adapted from UKMT (ukmt.org.uk) and SEAMC (seamc.asia) problems.
