

**Sum-sum**

$$\square \square + \square \square < \square \square + \square \square$$

$$\square \square + \square \square < \square \square + \square \square$$

$$\square \square + \square \square < \square \square + \square \square$$

$$\square \square + \square \square < \square \square + \square \square$$

$$\square \square + \square \square < \square \square + \square \square$$

**Take-take**

$$\square \square - \square \square < \square \square - \square \square$$

$$\square \square - \square \square < \square \square - \square \square$$

$$\square \square - \square \square < \square \square - \square \square$$

$$\square \square - \square \square < \square \square - \square \square$$

$$\square \square - \square \square < \square \square - \square \square$$

**Take-sum**

$$\square \square - \square \square < \square \square + \square \square$$

$$\square \square - \square \square < \square \square + \square \square$$

$$\square \square - \square \square < \square \square + \square \square$$

$$\square \square - \square \square < \square \square + \square \square$$

$$\square \square - \square \square < \square \square + \square \square$$

**Sum-take**

$$\square \square + \square \square < \square \square - \square \square$$

$$\square \square + \square \square < \square \square - \square \square$$

$$\square \square + \square \square < \square \square - \square \square$$

$$\square \square + \square \square < \square \square - \square \square$$

$$\square \square + \square \square < \square \square - \square \square$$
