HOW TO MAKE THE MOST POSSIBLE

To make the most possible days for the monkey to survive you have to use the closest fraction to the number.

MY METHOD

D 1. $47/48$ of 96 = $94 - 1 = 93$

A 2. $29/31$ of 93 = $87 - 1 = 86$

Y 3. $41/43$ of 86 = $82 - 1 = 81$

S 4. $25/27$ of 81 = $75 - 1 = 74$

5. $35/37$ of 74 = $70 - 1 = 69$

6. $22/23$ of 69 = $66 - 1 = 65$

7. $4/5$ of 65 = $52 - 1 = 51$

8. $15/17$ of 51 = $45 - 1 = 44$

9. $10/11$ of 44 = $40 - 1 = 39$

10. $12/13$ of 39 = $36 - 1 = 35$

11. $5/7$ of 35 = $25 - 1 = 24$

12. $4/6$ of 24 = $16 - 1 = 15$

13. $3/5$ of 15 = $9 - 1 = 8$

14. $1/4$ of 8 = $2 - 1 = 1$

15. 1 !!!

15 days for the monkey

to Live !!!
