

Number Line for Snake Pits

Cut each strip along the dotted line.

Fit all three together by sticking the 0-5 number line to the $5\frac{1}{2}$ -10 strip, overlapping in the grey shaded area. Then lay the 0-10 line over the $10\frac{1}{2}$ -15 strip in the same way and stick down. You should now have a complete number line from 0 to 15.
