

# Brush Loads

**Most - 22 brush loads**

**My trick was to balance it on the corners. Having the most possible faces not touching the table increases the number of brush loads.**

**21 brush loads**

**20 brush loads**

**19 brush loads**

**18 brush loads**

**17 brush loads**

**16 brush loads**

**Least - 15 brush loads**

**My trick for this one was to have the most possible faces facing down. Having the most possible faces facing down takes away a lot of brush loads.**
