

There is a particular value of  $\mathbf{x}$ , and a value of  $\mathbf{y}$  to go with it, which make all five expressions equal in value.

Can you find that **x**, **y** pair?

$$2x + 3y - 20 
5x - 2y + 38 
4x + 5y - 72 
x - 4y + 108 
3x - y + 39$$

Did you have more information that you needed to solve the problem?
