

## Building with Cubes 1

A. You have five cubes. They are blue, red, yellow, black and orange.

Now make this building.

Start with the yellow cube.

Put the black cube just behind it.

Put the orange cube on top of the black cube.

Put the red cube on the left of the yellow cube.

Put the blue cube on the right of the black cube.

What does your building look like? Can you draw it or photograph it?

B. Now try a building with these six cubes.

Start with the red and the black cubes.

Put the black cube underneath the red cube.

Put the orange cube on the right hand side of the black cube.

Put the yellow cube just in front of the orange cube.

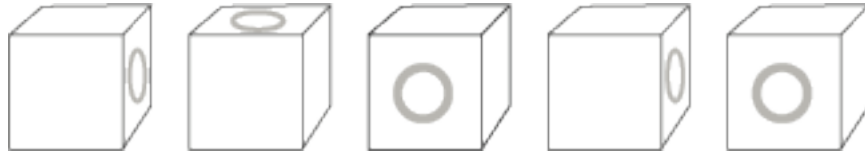

Put the pink cube on the right of the yellow cube.

Put the brown cube on top of the pink cube.

What does your building look like? Can you draw it or photograph it?
