## Mind Your Ps and Qs

Here are 8 propositions involving a real number $x$ ．
By choosing $p$ and $q$ from this list，how many correct statements of the form $p \Rightarrow q$ or $p \Leftrightarrow q$ can you make？

To do this，you need to be really sure what the two symbols $\Rightarrow$ and $\Leftrightarrow$ mean．
$p \Rightarrow q$ essentially means that IF $p$ is True THEN $q$ is true．
$p \Leftrightarrow q$ means that $p$ is true if and only if $q$ is true．
This means that $p \Rightarrow q$ and $q \Rightarrow p$ ．
Can you arrange these eight statements into two statements of the form $p \Rightarrow q$ and two statements of the form $p \Leftrightarrow q$ ？

| $x>4$ | $x=-2$ | $x>1$ | $x^{2}+4 x+4=0$ |
| :---: | :---: | :---: | :---: |
| $x^{3}>1$ | $x^{2}+x-2=0$ | $x>2$ | $x=1$ |
