

# Temperature

Temperature is often measured in Celsius ( $^{\circ}\text{C}$ ) or Fahrenheit ( $^{\circ}\text{F}$ ).

The freezing point of water is  $0^{\circ}\text{C}$  and  $32^{\circ}\text{F}$ .  
The boiling point of water is  $100^{\circ}\text{C}$  and  $212^{\circ}\text{F}$ .

**Is there a temperature at which the Celsius and Fahrenheit readings are the same?**
