

L.O: **Apply** knowledge of fractions, ratio and proportion to **understand** dilution in chemistry.

**Create** combinations of dilutions giving specific concentrations of solution.

---

I mix two glasses of lemonade...

Lemon	100 ml
Water	200 ml

Lemon	200 ml
Water	300 ml

Which drink has the stronger flavour?

L.O: **Apply** knowledge of fractions, ratio and proportion to **understand** dilution in chemistry.

**Create** combinations of dilutions giving specific concentrations of solution.
