A mathematics teacher is a midwife to ideas.
George Polya

Welcome to the home
of rich mathematics

Students find out here, **teachers** find out here, parents find out here.

Finding your way in the new look

Introducing features

The big change is that we're no longer holding new material till the start of a new month. Instead, themed features will be appearing as soon as they are ready. Pick the buttons you need to follow.

Under each button, you'll find the very **latest features** in your area together with selected links to **related** resources.

Treat **Collections** as a guided tour through our vast resource bank. Following these links will get you to our best resources first.

Finally, the **Trending** column is for all that's fast changing and new. Keep an eye on it.

Students

Teachers

Where did the old site go?

It's still here.

All the old resources are still here at the same web addresses. If there's a link that you used to see in the old site header, you should be able to find it in the **Student** or **Teacher** pages, or in the **footer** below.
