

Dan bought a packet of crisps and an ice cream.

The cost of both of them together is in one of the boxes below.

\$1.85	\$0.75	\$1.74	\$2.25	\$1	\$1.56
\$2.10	\$0.80	\$1.80	\$3.06	\$1.44	\$1.50
\$1.60	\$1.25	\$1.20	\$0.90	\$1.45	\$1.27

Use these clues to find out how much he paid:

1. You need more than three coins to make this amount.
2. There would be change from the most valuable coin.
3. The crisps cost more than \$0.50.
4. The ice cream costs exactly twice as much as the crisps.
