

Sealed Solution - 1

1) The last two because there can be only 1 option:

$$4+9=13 \text{ and } 8+6=14$$

2) $4+9=13$ and $8+6=14$

3) 2, 1, 3, 0 for '13' envelope and

4, 3, 2, 1, 0 for '14' envelope

because it is too small.

4) I can find 1 solution:

(2, 1)

(0, 7)

(5, 3)

(9, 4)

(8, 6)

5) Envelope '8' has 3 solutions: $5+3, 6+2, 7+1$
