

First, I saw Make 37 that all the numbers were odd. Then I remembered odd + odd always equals even. And even + even always equals even. And 37 is odd, so it is impossible to get 37 out of 1, 3, 5 and 7 using only 10 numbers.

OR	5	5	5	5	1	1	1	1	1	1	
	3	3	7	7	7	1	5	5	5	5	=37
OR	3	3	3	7	7	1	1	1	1	1	5

Its impossible...
