

Hunting for Averages

1 5 because $9 + 2 + 3 + 0 = 20$. Four numbers are added so $20 \div 4 = 5$.

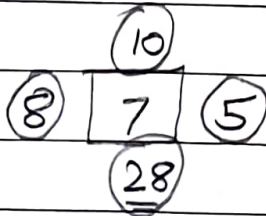

4 because $15 + 3 + 2 + 4 = 24 \div 4 = 6$. $4 \times 6 = 24$. $24 - 15 - 3 - 2 = 4$.

6 because $6 + 1 + 8 + 1 = 16 \div 4 = 4$. $16 - 1 - 8 - 1 = 6$
