2/11/26

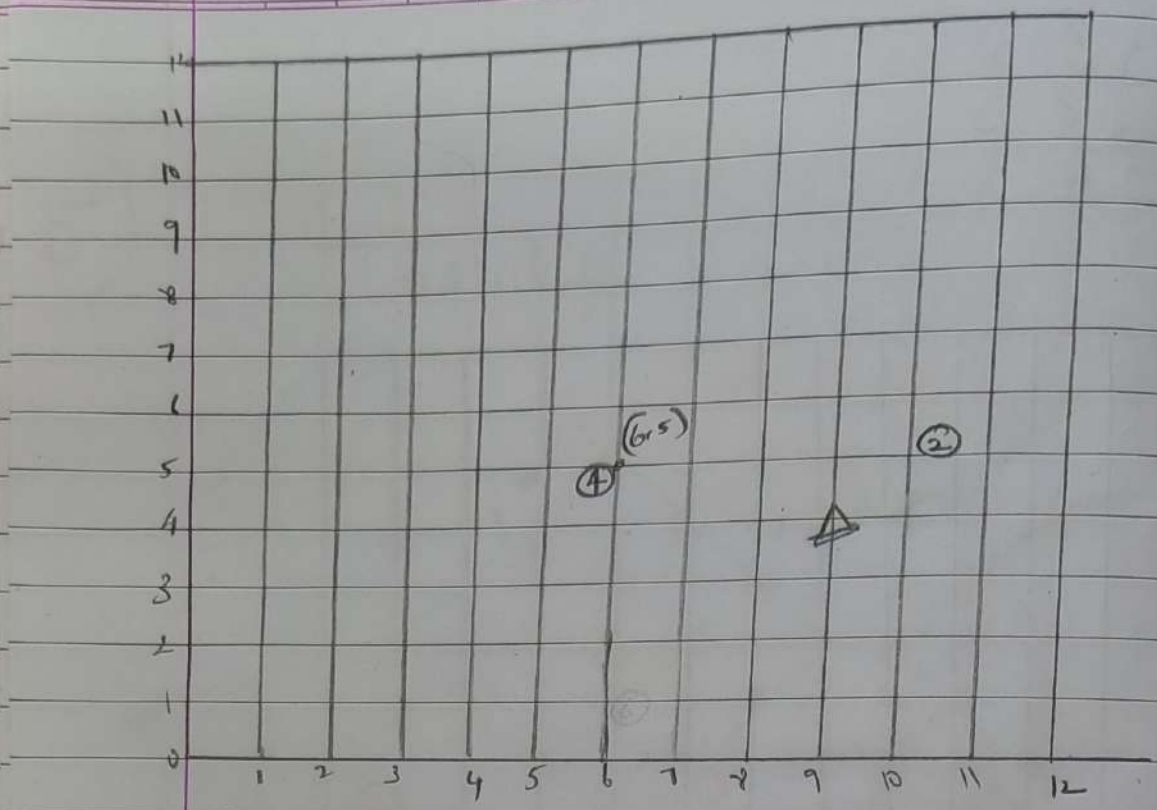

6,5 2 guesses

6,0

WIN

(6, 5) is 5 step away from treasure and so We go to (6,0) is 10 step away from treasure then we go to (1, 5) 5 step in x coordinate we win

(6, 5) 4 = step from treasure
(6, 5) 2 = step from treasure
⇨ win

Strategy for treasure Hunt

1 * Select any point in a graph and assess the distance from the treasure i guess

2 * mark all point of said distance around the selected point. We will get diamond shape around the point

3 * Now selected any point on the diamond with the distance based on the first guess - 2 guess and get the distance to treasure

4 * case 1 - the distance might increase so move in the opposite direction of the diamond - 3 guess

case 2 - the distance might decreased showing we are closer to treasure and correct treasure will be found - 4 guess

min guess - 1

max guess - 4
