	a		e			n	d		30
		c							
							m	a	30

28	90	280		360	6	252	6	360

Each column, each row and each 3x3 box must have the numbers 1 to 9.

No column, row or box can contain the same number more than once.

The nine letters in the grid each represent a different number from 1 to 9.

The numbers at the end of the rows and at the bottom of the columns are the Lowest Common Multiples (LCM) of the letters in that row.
